

## NATURAL SELECTION

A fourth edition of one of South Africa's most popular birding guides, *Sasol Birds of Southern Africa* (Struik Nature, R240), has just been published. It includes 380 new and improved illustrations, updated distribution maps, calendar bars outlining breeding months and sonograms of the calls of some of the trickier-to-identify species. The book was authored by respected birding bofs Ian Sinclair, Phil Hockey, Peter Ryan and Warwick Tarboton. An updated mobile application, *Sasol eBirds of Southern Africa*, has also been released by Struik Nature.
